

HB 826 -- Sale of Drug Substitutes

Sponsor: Wood

This bill requires retail outlets selling loose leaf or granular potpourri or incense containing any chemical that has been advertised, marketed, distributed, or reported as a drug substitute to clearly label each product with the potential health effects of the chemical. If a retail outlet displays or sells a product without the proper label the outlet must forfeit all inventory of the product to the authorities to be destroyed, unless the product is needed for evidence.
